## SKILLS

HTML5

GIT

JavaScript ES6

Web Accessibility

CSS3/SCSS

NPM

React

Styled-Components

## EXPERIENCE

**Freelance Web Developer, Remote** - *October 2020 - Present.*

**SandR Assisted Living** - [www.sandrassistedliving.com](http://www.sandrassistedliving.com) - **ReactJS**

Created a custom responsive mobile first website to the specifications that the client required. All form data handled with fetch calls to netlify's API. Attention to web Accessibility (WCAG) was a high priority.

- Custom styles using CSS preprocessor SASS
- Increase in user interaction from clean and user friendly navigation
- Chrome extension Axe-Coconut used to ensure the site meets WCAG requirements (ex. Color Contrast, Semantic HTML5)

## PROJECTS

**Room (E-commerce)** - <https://room-static.netlify.app/> - **ReactJS**

Ecommerce website using a random product API and Easyship API to calculate shipping rates. Takes you through an ecommerce workflow. Using React Context API for state management and local storage for cart information to persist on reloads. Landing page is based on a provided mock up (wireframe). Form handling provided by netlify's API.

- Integrated React-Spring for smooth animations when components mount and unmount
- Used React Context API in conjunction with useReducer for one source of truth

## EDUCATION

**Scrimba, Front End Dev course** - *August 2020 - October 2020*
